

Become a part of our team!

Chrestos is a statistical health consultancy offering services to the pharmaceutical industry in the area of CRO. In our projects we work closely with our customers – both in our head offices or at our customer's location.

In order to strengthen our team we are looking for a

Biostatistician (m/f) in oncology phase I/IIa

Your responsibilities

- You work in international teams and you are the expert for the statistical aspects of your work.
- You are concerned with the planning, programming, documentation and presentation of statistical analyses within the scope of clinical research with a focus on clinical oncology studies phase I/IIa.
- You work closely with employees of Chrestos as well as of our customers in international teams. At the same time you work independently and goal-oriented.
- You discuss the statistical aspects of your work with experts of related disciplines (i.e. medical science, pharmacokinetics, medical writing) and you are capable to present them in a comprehensible manner.
- You constantly deepen your knowledge in the pharmaceutical industry and in principle you are also prepared to work as a statistician in other areas of clinical research or in corporate health management (CHM).
- You actively contribute to the work environment.

Your qualifications

- You come with an above-average masters degree in statistics, mathematics, data science or bioinformatics or you completed your studies in a cognate discipline.
- You have a high affinity to programming and substantial knowledge in the programming languages SAS or R.
- You have a very good knowledge of both spoken and written German and English.
- You are interested in statistical results of analyses in clinical research and you have the statistical knowledge to achieve high-quality results.
- You are able to work in a structured, goal-oriented and independent way.
- It is easy for you to approach people and to integrate them into your work.
- Ideally you have already gained initial (professional) experience within the field of clinical studies.
- Oncological background know-how as well as a doctorate would be an advantage but not a precondition.

Do you have team spirit, humour and open-mindedness? You want to be part of an ambitious team that works with joy, passion and flexibility? Then we look forward to getting to know you. In regular trainings and certifications we ensure that you meet all specified requirements and that you develop yourself further on a personal and professional level. As part of our internal CHM, we offer you a varied programme of health-promoting measures. At Chrestos you have many opportunities to express yourself and your ideas.
