

Become a part of our team!

Chrestos is a statistical health consultancy offering services to the pharmaceutical industry in the area of CRO. In our projects we work closely with our customers – both in our head offices or at our customer's location.

In order to strengthen our team we are looking for a

Biostatistician (m/f/d) in oncology phase I/IIa

Your responsibilities

- You will be working in international teams and you will be responsible for expertise in all statistical aspects of your work.
- You will be involved in the planning, programming, documentation and presentation of statistical analyses within the scope of clinical research with a focus on clinical oncology studies phase I/IIa.
- You will work hand-in-hand with Chrestos employees as well as our customers in international teams. At the same time, you will be working independently and goal-oriented.
- You will be discussing the statistical aspects of your work with experts of related disciplines (i.e. medical science, pharmacokinetics, medical writing) and will be required to present them in a comprehensible manner.
- You will have the opportunity to constantly deepen your knowledge in the pharmaceutical industry and are, basically, open to work as a statistician in other areas of clinical research or in corporate health management (CHM).
- You will be actively contributing to the work environment.

Your qualifications

- You have an above-average master's degree in statistics, mathematics, data science or bioinformatics or you have successfully completed your studies in a related field.
- You have a high affinity to programming and very good knowledge in SAS or R.
- You have a very good spoken and written German and English skills.
- You are interested in statistical analyses in the field of clinical research and you have the statistical knowledge to achieve high-quality results.
- You are able to work in a structured, goal-oriented and independent way.
- It is easy for you to approach people and to integrate them into your work.
- Ideally, you have professional experience or previous knowledge in clinical studies.
- It would be an advantage to have oncological background or a doctorate, although this is no prerequisite.

Do you have team spirit, humor and an open mind? You want to be part of an ambitious team that works with joy, passion and flexibility? If so, we are looking forward to getting to know you. We give you the opportunity through further training to develop personally and professionally. As part of our internal CHM, we offer you an extensive program of health-promoting measures. At Chrestos you have many opportunities to bring in yourself and your own ideas.
