

Become a part of our team!

Chrestos is a consultancy that within its business division CRO offers services to the pharmaceutical industry. We support our customers in the planning and analysis of clinical studies.

In order to strengthen our team we are looking for a

SAS-Programmer (m/f)

Your responsibilities

- As a statistical programmer you are involved in the development of SAS-programs to evaluate clinical studies.
- You program analysis data sets and create listings, tables and figures.
- You ensure that specifications are met and the quality of programs and data sets are assured.
- You are responsible for the results of your programs and monitor the outcomes using plausible, professional and technical terms.
- You validate and document programs in accordance to current guidelines and procedures.

Your qualifications

- You have an above-average Master's degree in statistics, mathematics, data science or you have completed your studies in a cognate discipline.
- You have at least 5 years of job experience. Experience in the field of oncology is preferable.
- You have substantial knowledge in SAS or R programming language.
- Your programming methods show a clear structure and is easily understandable and you enjoy programming.
- You are interested in the statistical objectives of analysis in clinical studies and keep up a high standard in order to achieve high-quality results.
- You have very good skills in written German and English.
- You think customer-oriented, you are a team-player and have good communication skills.

Do you have a great team spirit and a sense of humor? Do you want to be a part of a team that works with pleasure and passion? Then we would love to meet you. Through regular training and certifications, we ensure that you will acquire all the specified requirements needed to make further progress on a personal and professional level. Within our corporate health management system, we offer a diverse program of health-promoting measures, which support you in sustaining a healthy and efficient environment. At Chrestos you will have many opportunities to incorporate your own ideas and add to the growth of our innovative company.
